## ST8 / ST8Ti

LENGTH: 7.75

The ST Series Suppressors represent one of the most durable and high-performance suppressor families currently available from us, a 3D-printed monolithic design constructed from the nickel-based superalloy Haynes® 282. The ST8 model is engineered for sustained full-automatic fire, delivering superior acoustic suppression, thermal management, and flash mitigation for the operator.

Also available in Ti-6Al-4V (Grade 5 Titanium), the lightweight variant is optimized for controlled rate and precision shooting applications. *Full-automatic operation is not recommended for the Ti variant.*

All ST Suppressors utilize a forward-venting monolithic architecture with an integrated flash hider, engineered to stabilize cyclic rate and minimize back pressure through strategically placed assist ports. Each unit is coated with AT-1420 AlphaShield™ Elite, a near-infrared signature-reducing, non-reflective protective finish, enhancing durability, corrosion resistance, and operational concealability.

- COMPLETE SIGNATURE REDUCTION
- HEAT RESISTANT 3-D PRINTED DESIGN
- MINIMAL POINT-OF-IMPACT SHIFT
